

Source Accessibility Ltd Carbon Reduction Plan

Date: 01 October 2026

Company registration number: 16571562

Registered address: London, United Kingdom (Full address available upon request)

Website: <https://sourceaccessibility.co.uk>

1. Commitment to Achieving Net Zero by 2050

Source Accessibility Ltd is committed to achieving Net Zero greenhouse gas (GHG) emissions by 2050.

As a remote-first digital accessibility consultancy, we already operate with an exceptionally low carbon footprint and continue to take steps to measure, monitor, and reduce emissions over time.

2. Baseline Emissions Footprint

Baseline emissions are the reference point against which future reductions are measured.

As Source Accessibility Ltd was incorporated in 2025, our initial baseline reporting period is set for **FY 2025–2026**.

Baseline emissions calculation is aligned with the **BEIS GHG Reporting Guidelines** to track ongoing sustainability performance.

3. Current Emissions Reporting

Emissions Scope	Description	FY 2026–2027 (Est.)
-----------------	-------------	---------------------

Scope 1	Direct emissions (fuel combustion, company vehicles)	0 tCO₂e – no vehicles or on-site fuel use
Scope 2	Indirect emissions from purchased electricity (lighting, laptops, etc.)	< 0.2 tCO₂e – home-office electricity use (renewable tariff where possible)
Scope 3	Indirect emissions (business travel, cloud use, purchased goods)	< 0.5 tCO₂e – limited travel, predominantly remote collaboration

Total Estimated Annual Emissions: < 1 tCO₂e

4. Emissions Reduction Targets

Although small, Source Accessibility Ltd recognises the importance of continuous improvement.

We aim to achieve:

- Net Zero by 2050
- Interim target: 50 % reduction in Scope 1 and 2 emissions by 2030

5. Carbon Reduction Projects

Measures in place or planned include:

- 100 % remote and flexible working (no permanent office)
- Use of energy-efficient equipment and renewable-energy tariffs where available
- Cloud-based systems replacing physical infrastructure

- Minimal paper use and digital documentation
 - Preference for virtual meetings and public transport when travel is essential
 - Annual review of suppliers' environmental credentials
 - Future use of verified carbon-offset schemes once emissions are quantified
-

6. Declaration and Sign-off

This Carbon Reduction Plan has been completed in accordance with **PPN 06/21** and associated guidance.

It has been reviewed and approved by the Director of Source Accessibility Ltd.
